

Protecting consumers from the extraordinarily high charges from some out-of-network physicians is an important policy issue in an era when our nation is facing major economic and health care systems challenges. A recent survey of America's Health Insurance Plan (AHIP) members collected data on various out-of-network physician billed charge amounts for claims submitted in 2008. As demonstrated in the below table, out-of-network physicians in Arizona billed between 670 and 1,670 percent of the Medicare fee for that service in 2008.

VARIOUS OUT-OF-NETWORK PHYSICIAN CLAIMS FILED IN THE STATE OF ARIZONA IN 2008

CPT Code	Service Description	Amount Billed	Medicare Fee	Amount Billed as % of Medicare Fee
99215	Outpatient office visits of moderate to high severity requiring 2 out of 3: comprehensive history, comprehensive exam and high complexity medical decision-making	\$ 2,000.00	\$ 120.02	1,666%
66984	Cataract surgery with insertion of artificial lens	\$ 8,691.00	\$ 618.60	1,405%
36471	Chemical injection to kill leg veins	\$ 2,200.00	\$ 165.20	1,332%
27130	Total hip replacement	\$ 17,357.00	\$ 1,315.60	1,319%
43239	Upper GI endoscopic visual diagnostic exam with biopsy	\$ 3,895.50	\$ 322.93	1,206%
29881	Minimally invasive knee meniscus surgery	\$ 6,577.08	\$ 578.18	1,138%
63075	Surgical removal of all/or part of the intervertebral disc inc. spiny growths	\$ 12,600.00	\$ 1,247.16	1,010%
22612	Lower back spinal fusion	\$ 14,000.00	\$ 1,439.69	972%
47562	Laparoscopic gallbladder removal	\$ 4,500.00	\$ 632.56	711%
99244	Outpatient office consults of moderate to high severity requiring a comprehensive history, comprehensive exam and moderate complexity medical decision-making	\$ 1,190.00	\$ 176.83	673%

August 2009

Overview of Survey Methodology: In May 2009, America's Health Insurance Plans (AHIP) asked Dyckman & Associates (Dyckman) to collect and analyze results of a survey of member plans in order to identify the highest 2008 billed charges by non-participating physicians in the 30 most populous states for certain CPT (Current Procedural Terminology) codes representing various categories of physician services. Surveys were returned to Dyckman from ten plans: national plans that operate in most surveyed states, and regional plans that operate in one or a few states. Tables were provided to AHIP in a format that did not identify survey respondents or associate data with a specific plan. Dyckman used a conservative approach to the data that excluded high charge outliers that may reflect billing or coding errors.

The Value of Provider Networks and the Role of Out-of-Network Provider Charges in Rising Health Care Costs

Protecting consumers from runaway charges billed by some out-of-network physicians is an important policy issue at a time of major economic challenges and a national debate surrounding health care reforms.

One tool that health insurance plans use to improve quality and make health care more affordable for consumers is the establishment of provider networks.

- By selectively contracting with credentialed providers, health plans ensure consumers affordable access to a wide choice of high-quality doctors and hospitals. Nationally, it is estimated that close to 90 percent of providers participate in networks.
- Consumers see measurable savings when they visit contracted providers because in-network physicians are generally prohibited from charging patients the difference between billed charges and a negotiated rate. Also, consumers who receive services from in-network providers typically have lower cost-sharing obligations. Over the decades, this has saved consumers billions of dollars in out-of-pocket costs and premiums.

Some out-of-network providers are charging exorbitant prices – several hundred or even over a thousand percent of the Medicare reimbursement for the same service in the same area.

- Recent examples: \$4,500 for an office visit when Medicare would have paid \$134; \$14,400 for removal of a gallbladder when Medicare would have paid \$656; and \$40,000 for a total hip replacement when Medicare would have paid \$1,558.
- Attached is state-specific data, along with information on how it was compiled.

Consumers who are charged exorbitant fees by out-of-network providers incur additional costs because the protection against balance billing generally does not extend to services provided out-of-network. This detracts from the ability of health plans to offer affordable access to out-of-network providers for those consumers who want the advantages of a network, but also maintain the option to go out-of-network if they choose.
