

Protecting consumers from the extraordinarily high charges from some out-of-network physicians is an important policy issue in an era when our nation is facing major economic and health care systems challenges. A recent survey of America's Health Insurance Plan (AHIP) members collected data on various out-of-network physician billed charge amounts for claims submitted in 2008. As demonstrated in the below table, out-of-network physicians in Michigan billed between 560 and 1,570 percent of the Medicare fee for that service in 2008.

### VARIOUS OUT-OF-NETWORK PHYSICIAN CLAIMS FILED IN THE STATE OF MICHIGAN IN 2008

CPT Code	Service Description	Amount Billed	Medicare Fee	Amount Billed as % of Medicare Fee
47562	Laparoscopic gallbladder removal	\$ 11,567.00	\$ 736.71	1,570%
43239	Upper GI endoscopic visual diagnostic exam with biopsy	\$ 4,143.47	\$ 313.98	1,320%
66984	Cataract surgery with insertion of artificial lens	\$ 8,240.00	\$ 670.63	1,229%
29881	Minimally invasive knee meniscus surgery	\$ 6,073.00	\$ 582.87	1,042%
27130	Total hip replacement	\$ 11,721.00	\$ 1,337.21	877%
45380	Colonoscopy with biopsy	\$ 2,789.00	\$ 428.36	651%
22612	Lower back spinal fusion	\$ 10,996.00	\$ 1,737.28	633%
58150	Total abdominal hysterectomy	\$ 5,365.00	\$ 914.60	587%
19120	Benign breast lesion removal	\$ 2,279.00	\$ 400.46	569%
63075	Surgical removal of all/or part of the intervertebral disc inc. spiny growths	\$ 8,594.00	\$ 1,543.32	557%

August 2009

Overview of Survey Methodology: In May 2009, America's Health Insurance Plans (AHIP) asked Dyckman & Associates (Dyckman) to collect and analyze results of a survey of member plans in order to identify the highest 2008 billed charges by non-participating physicians in the 30 most populous states for certain CPT (Current Procedural Terminology) codes representing various categories of physician services. Surveys were returned to Dyckman from ten plans: national plans that operate in most surveyed states, and regional plans that operate in one or a few states. Tables were provided to AHIP in a format that did not identify survey respondents or associate data with a specific plan. Dyckman used a conservative approach to the data that excluded high charge outliers that may reflect billing or coding errors.

## **The Value of Provider Networks and the Role of Out-of-Network Provider Charges in Rising Health Care Costs**

*Protecting consumers from runaway charges billed by some out-of-network physicians is an important policy issue at a time of major economic challenges and a national debate surrounding health care reforms.*

**One tool that health insurance plans use to improve quality and make health care more affordable for consumers is the establishment of provider networks.**

- By selectively contracting with credentialed providers, health plans ensure consumers affordable access to a wide choice of high-quality doctors and hospitals. Nationally, it is estimated that close to 90 percent of providers participate in networks.
- Consumers see measurable savings when they visit contracted providers because in-network physicians are generally prohibited from charging patients the difference between billed charges and a negotiated rate. Also, consumers who receive services from in-network providers typically have lower cost-sharing obligations. Over the decades, this has saved consumers billions of dollars in out-of-pocket costs and premiums.

**Some out-of-network providers are charging exorbitant prices – several hundred or even over a thousand percent of the Medicare reimbursement for the same service in the same area.**

- Recent examples: \$4,500 for an office visit when Medicare would have paid \$134; \$14,400 for removal of a gallbladder when Medicare would have paid \$656; and \$40,000 for a total hip replacement when Medicare would have paid \$1,558.
- Attached is state-specific data, along with information on how it was compiled.

**Consumers who are charged exorbitant fees by out-of-network providers incur additional costs because the protection against balance billing generally does not extend to services provided out-of-network. This detracts from the ability of health plans to offer affordable access to out-of-network providers for those consumers who want the advantages of a network, but also maintain the option to go out-of-network if they choose.**
